Teppo Lappalainen

Fullstack | Web-Developer

I work with modern web technologies to build full stack applications from user interfaces to backend and cloud services. I also develop my skills through personal projects and use generative AI to support my software development workflow.

- **Languages** - HTML, CSS, Javascript, TypeScript, Python
- **Libraries & Frameworks** - Angular, React, Next.js, Tailwind CSS, Material UI, Express, NestJS, Koa.js
- **Cloud techologies** - AWS (Lambda, SES, CDK, S3, DynamoDB, Cognito, CodeCommit, CloudWatch)
- **Backend** - Node.js, REST API:t, Auth, Stripe API, SQL/NoSQL, PostgreSQL, MariaDB, MongoDB, DynamoDB, TypeORM
- **Tools & Platforms** - Git, Docker compose, VS Code, Cursor, ChatGPT, Amazon Q
- **Other** - CI/CD pipelines, LLM-integration (Gemini API), Webhooks, Responsive design

Hobby projects

ChatApp

- A modern, full-stack real-time chat application featuring instant messaging, image sharing, and real-time notifications.
- Built with React frontend and Node.js backend, using Socket.io for WebSocket communication, MongoDB for persistent message and user storage and Cloudinary for image management.

TopShelf Market

- Built a E-Commerce Site with features secure authentication with NextAuth.js, dynamic product management using Next.js and Sanity CMS
- A redux-powered shopping cart, custom APIs for checkout, responsive design with Tailwind CSS and webhook support with Stripe for handling external events like payment confirmations.

Education

2021 - 2025 | Jyväskylä University Of Applied Sciences
Bachelor of Engineering - Information and Communication Technology

2016 - 2019 | Sipoo High School
